

There are different ways that people obtain CSAM. Some have downloaded this *type of material* from peer-to-peer networks. Others use other types of social media. Sometimes *people say they* downloaded CSAM by accident. In almost all cases, this isn't really true. You might want to ask **yourself** the following questions:

- If you saw it accidentally, what was your initial reaction to it?
- What did you do with it after you realized what it was?
- Did you keep it? Why?
- What search terms were you using?
- How tech-savvy are you?
- Did you erase searches? Clear cache? Use software that camouflaged what you were doing?
- Save files with new names that seemed innocent?
- Did you organize your photos, videos, or other CSAM materials so you could easily find them later?
- What was the ratio of your CSAM compared to adult porn?
- Did you repeatedly look at certain material?
- Did you hide what you were doing from others? Why?
- Did you feel like you had a secret online sexual life?
